

Validation Record

Project Alpha - RIBA 4 - ELEC - Review

6 March 2026

Compliance Summary

78% Overall Package Compliance

Check	Compliance	Pass	Fail	Warn
Register	72%	122	47	15
Naming	99%	119	1	0
Title Block	62%	73	46	1

137 files scanned - 47 missing - 15 not in register

Executive Summary

Package requires significant attention — compliance is below the acceptable threshold.

Title Block is the lowest-scoring check at 62% compliance.

"Missing from Package" is the most frequent issue type (47 occurrences).

Issues are concentrated in ELEC deliverables.

Recommend reviewing 94 flagged documents before approval.

Auto-generated summary (rules-based)

Top Issues

- **Missing from Package (47)**
Listed in register but no matching file delivered
- **Title Block Non-compliant (47)**
Title block fields do not match expected baseline
- **Not in Register (15)**
File in folder but not listed in deliverables register

● **Naming Non-compliant (1)**

Filename does not match naming standard

Appendix: Why This Failed

Based on rule definitions (auto-generated)

Title Block Non-compliant (x42)

One or more title block fields do not match the expected baseline values.

Common causes:

- Revision code in the title block differs from the expected value
- Suitability code or project phase description was not updated after review
- Title block was not refreshed before submission

Remediation:

Update the title block fields to match the expected baseline, then re-export the PDF and re-run the check.

Example: Revision Code: expected "P02", found "P01".

Title Block Non-compliant (x3)

One or more title block fields do not match the expected baseline values.

Common causes:

- Revision code in the title block differs from the expected value
- Suitability code or project phase description was not updated after review
- Title block was not refreshed before submission

Remediation:

Update the title block fields to match the expected baseline, then re-export the PDF and re-run the check.

Example: Revision Description: expected "Issued for review and comments", found "Issued for Review and Comment".

Missing from Package (x1)

This document is listed in the deliverables register but no matching file was found in the uploaded package.

Common causes:

- File was not included in the submission folder
- Filename differs from the register entry (typo or revision suffix)
- File was renamed after the register was issued

Remediation:

Add the missing file to the package, or update the register to remove this entry if it is no longer required.

Example: Expected "DUB26-XXXX-XX-ATM-SD-E-61007-Electrical Services MV Auxiliary Supplies", found "N/A".

Appendix: Why This Failed

Based on rule definitions (auto-generated)

Missing from Package (x1)

This document is listed in the deliverables register but no matching file was found in the uploaded package.

Common causes:

- File was not included in the submission folder
- Filename differs from the register entry (typo or revision suffix)
- File was renamed after the register was issued

Remediation:

Add the missing file to the package, or update the register to remove this entry if it is no longer required.

Example: Expected "DUB26-XXXX-XX-ATM-SD-E-61008-Electrical Services Interconnection Diagrams", found "N/A".

Missing from Package (x1)

This document is listed in the deliverables register but no matching file was found in the uploaded package.

Common causes:

- File was not included in the submission folder
- Filename differs from the register entry (typo or revision suffix)
- File was renamed after the register was issued

Remediation:

Add the missing file to the package, or update the register to remove this entry if it is no longer required.

Example: Expected "DUB26-XXXX-XX-ATM-SD-E-61107a-Electrical Services MBP2C Electrical Power Supply Single Line Diagram", found "N/A".

Missing from Package (x1)

This document is listed in the deliverables register but no matching file was found in the uploaded package.

Common causes:

- File was not included in the submission folder
- Filename differs from the register entry (typo or revision suffix)
- File was renamed after the register was issued

Remediation:

Add the missing file to the package, or update the register to remove this entry if it is no longer required.

Example: Expected "DUB26-XXXX-XX-ATM-SD-E-61108b-Electrical Services MBP2D Electrical Power Supply Single Line Diagram", found "N/A".
